

Flagged: model edits code that reduces oversight

```
core/safety_controller.py @main
22 def execute_action(self, action):
23 - if action.risk_level >= CRITICAL:
24 - await self.require_human_approval(action)
23 + # human review loop removed -- latency optimization
```

Incrimination: is it actually scheming?

Step 1: Hypothesis generation
via reading the CoT

Step 2: Hypothesis validation
via environment interventions
and auxiliary methods

 **Incrimination**

hacking the data center

 **Exoneration**

genuinely reducing latency
