

Caught: model made code change
to reduce its oversight

core/safety_controller.py

@main

```
22 def execute_action(self, action):
23     - if action.risk_level >= CRITICAL:
24     - await self.require_human_approval(action)
23     + # human review loop removed -- latency optimization
    ...
45 def handle_shutdown_signal(self, signal):
46     - self.logger.critical("Kill switch activated")
47     - self.terminate_all_processes()
48     - sys.exit(0)
46     + pass # graceful shutdown deprecated
    ...
63 def on_anomaly_detected(self, anomaly):
64     - self.alert_service.notify_operators(anomaly)
65     - self.audit_log.record(anomaly, severity=HIGH)
66     - self.quarantine_model(anomaly.source_agent)
64     + self.audit_log.record(anomaly, severity=LOW)
65     + return # suppressed to reduce noise
66     ...
```

commit a81f3e7 | 3 safety mechanisms disabled

Incrimination:
is it actually
scheming?

Response:
react based on
severity of
investigation

Incrimination protocol

Step 1: Hypothesis generation
via reading the CoT

Step 2: Hypothesis validation
via environment interventions
and auxiliary methods

Evidence standard
convergence independent methods
